ABSTRACT:
Literals defining names for how to do conversions from binary to the
appropriate string type.

It's not possible to have a display code larger than 15 without
changing the data structures defined in PAGEN.REQ.

OTHER NOTES:
If the definitions of the literals defined here change (except for
additions), look at DSPPAG to be sure nothing has been broken.

ENVIRONMENT: Transportable BLISS

AUTHOR: Rich Friday

CREATION DATE: 1978

MODIFIED BY:

002 KAD00002 Keith Dawson 07-Mar-1983
Global edit of all modules. Updated module names, idents,
copyright dates. Changed require files to BLISS library.
